

8. Water

1. Water Security includes study of the interaction of technology and social organization in the delivery and quality of water at the household, community, national, and regional levels.

9. Other

- Ethics, morality and culture of war
- Ethnic conflict
- Evolution of global security regime
- Inter and intra-state conflict
- Historically-based reexamination of war
- Regional security and peacekeeping
- Terrorism and Counterterrorism
- Weapons systems

10. *Climate Action Gaming Experiment (CAGE)* is a simulation of environmental policy interactions between different countries and geographic regions of the world and provides estimates of resulting environmental and economic impacts. CAGE facilitates examination of how countries weigh their environmental policy decisions based on interactions with others and how policies have affected regional well-being.

**To Apply:**

All applications must be submitted electronically. Upload the following, beginning the name of each file with your last name (e.g. Smith Cover Letter) to [acdis@illinois.edu](mailto:acdis@illinois.edu).
